

ERRATUM

Dear Editor,

Re: "Blood cholinesterase levels in a group of Malaysian blood donors" by Chan L, Balabaskaran S, Delilkan AE and Ong LH. *Malays J Pathol* 1994; 16 (2): 161-4.

I refer to the above article where a value has been erroneously included in a table. On page 163, Table 3: **ChE** levels that are unaffected by race, age group or blood group - the **plasma ChE level for male (2.76±0.75) should not be included in this table**. The plasma ChE level in male has already been shown to be affected by ethnicity in Figure 1, page 163. The error is very much regretted.

Thank you.

Dr. Lucy Chan
